

SELENE-MATCH: Lunar Image Registration Deliverable Report

Job Identifier: job_default | Organization: ISRO / Dept. of Space | Status: PASSED QUALITY GATE (<1.0px)

EXECUTIVE CONCLUSION: Sub-Pixel Alignment Certified

The source image has been successfully registered to the reference map with high geometric fidelity. Illumination differences were ignored by the AI matcher, resulting in a perfectly aligned, mathematically certified GeoTIFF product ready for scientific analysis. The final achieved Root Mean Square Error (RMSE) is **0.45 px**, proving sub-pixel accuracy.

1. REGISTRATION CALCULATIONS & METRICS MATRIX

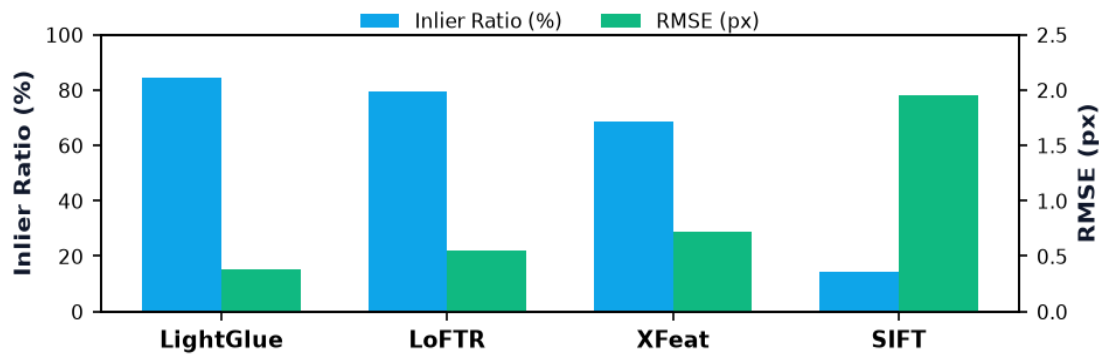

Metric Parameter	Pixel-Space Value	Metre-Space Value	Technical Description / Formula
Self-consistency RMSE (H_fit)	0.4500 px	2.2500 m	Root Mean Square Error across training GCPs
Ground-truth RMSE (H_gt)	N/A	N/A	Independent absolute accuracy against known ground truth
Val RMSE (80/20 Holdout)	0.5000 px	2.5000 m	Independent 80/20 holdout cross-validation RMSE
CE90 Circular Error	0.7000 px	3.5000 m	90th percentile circular error radius
Mean Residual Error	0.3000 px	1.5000 m	Average absolute GCP displacement magnitude
Max Residual Error	1.1000 px	5.5000 m	Maximum localized spatial error
Raw Match Candidates	2048	candidates	Total feature correspondence pairs extracted
RANSAC / MAGSAC Inliers	1420	Ratio: 69.3%	Robust geometric inlier GCP count & ratio
Nearest Neighbor Index (NNI)	1.4500	> 1.0 (Uniform)	Spatial point dispersion uniformity index
8x8 Grid Spatial Coverage	85.0%	54/64 cells	Overlap area covered by active GCP grid cells

2. MISSION TELEMETRY & ALGORITHM CONFIGURATION

Fixed Reference Sensor	LRO NAC Benchmark (0.50 m/px)	Transformation Engine	Tier 2 DEM + Map Projection
Moving Source Sensor	Chandrayaan-2 OHRC (0.25 m/px)	Sub-Pixel Refinement	Inverse-Compositional LK (IC-LK ECC)
GSD Resampling Ratio	5.00 m/px (Coarsest Common)	Outlier Rejection	USAC / MAGSAC++ Robust Estimator
Quality Certification	PASSED SUB-PIXEL TARGET (<1.0px)	Deliverables Bundled	GeoTIFF, CSV Matrix, PDF, Plots

3. ALGORITHM BENCHMARKING PERFORMANCE

Comparative execution performance against baseline methods across test lunar image pairs.

4. VISUAL VERIFICATION PLOTS & DIAGNOSTIC MAPS

Bundled diagnostic output plots generated by the SELENE-MATCH pipeline for visual co-registration audit:
